The MDS 3.0 Assessment Change report lists which MDS answers are different between the two chosen assessments

Use the runtime options to choose

- Assessment 1
- Assessment 2

These do not have to be the same type of assessment. If comparing two different types of assessments the report will list the questions that were answered in one but not the other as well as the answers that are different,

CALCULATION OF TOTAL "ADL" SCORE RUG-IV, 66-GROUP HIERARCHICAL CLASSIFICATION

The ADL score is a component of the calculation for placement in all RUG-IV groups. The ADL score is based upon the four "late loss" ADLs (bed mobility, transfer, toilet use, and eating), and this score indicates the level of functional assistance or support required by the resident. It is a very important component of the classification process.

STEP # 1

To calculate the ADL score use the following chart for bed mobility (G0110A), transfer (G0110B), and toilet use (G0110I). Enter the ADL score for each item.

Self-Performance Column 1 =		Support Column 2 =	ADL Score =	SCORE
-, 0, 1, 7, or 8	and	(any number)	0	G0110A = __
2	and	(any number)	1	G0110B = __
3	and	-, 0, 1, or 2	2	G0110I = __
4	and	-, 0, 1, or 2	3	
3 or 4	and	3	4	

STEP # 2

To calculate the ADL score for eating (G0110H), use the following chart. Enter ADL score.

Performance Column 1 (G0110H) =		Support Column 2 =	ADL Score =	SCORE
-, 0, 1, 2, 7, or 8	and	-, 0, 1, or 8	0	G0110H = __
-, 0, 1, 2, 7, or 8	and	2 or 3	2	
3 or 4	and	-, 0, or 1	2	
3	and	2 or 3	3	
4	and	2 or 3	4	

STEP # 3

Add the four scores for the total ADL score. This is the RUG-IV TOTAL ADL SCORE. The total ADL score ranges from 0 through 16.

TOTAL RUG-IV ADL SCORE __

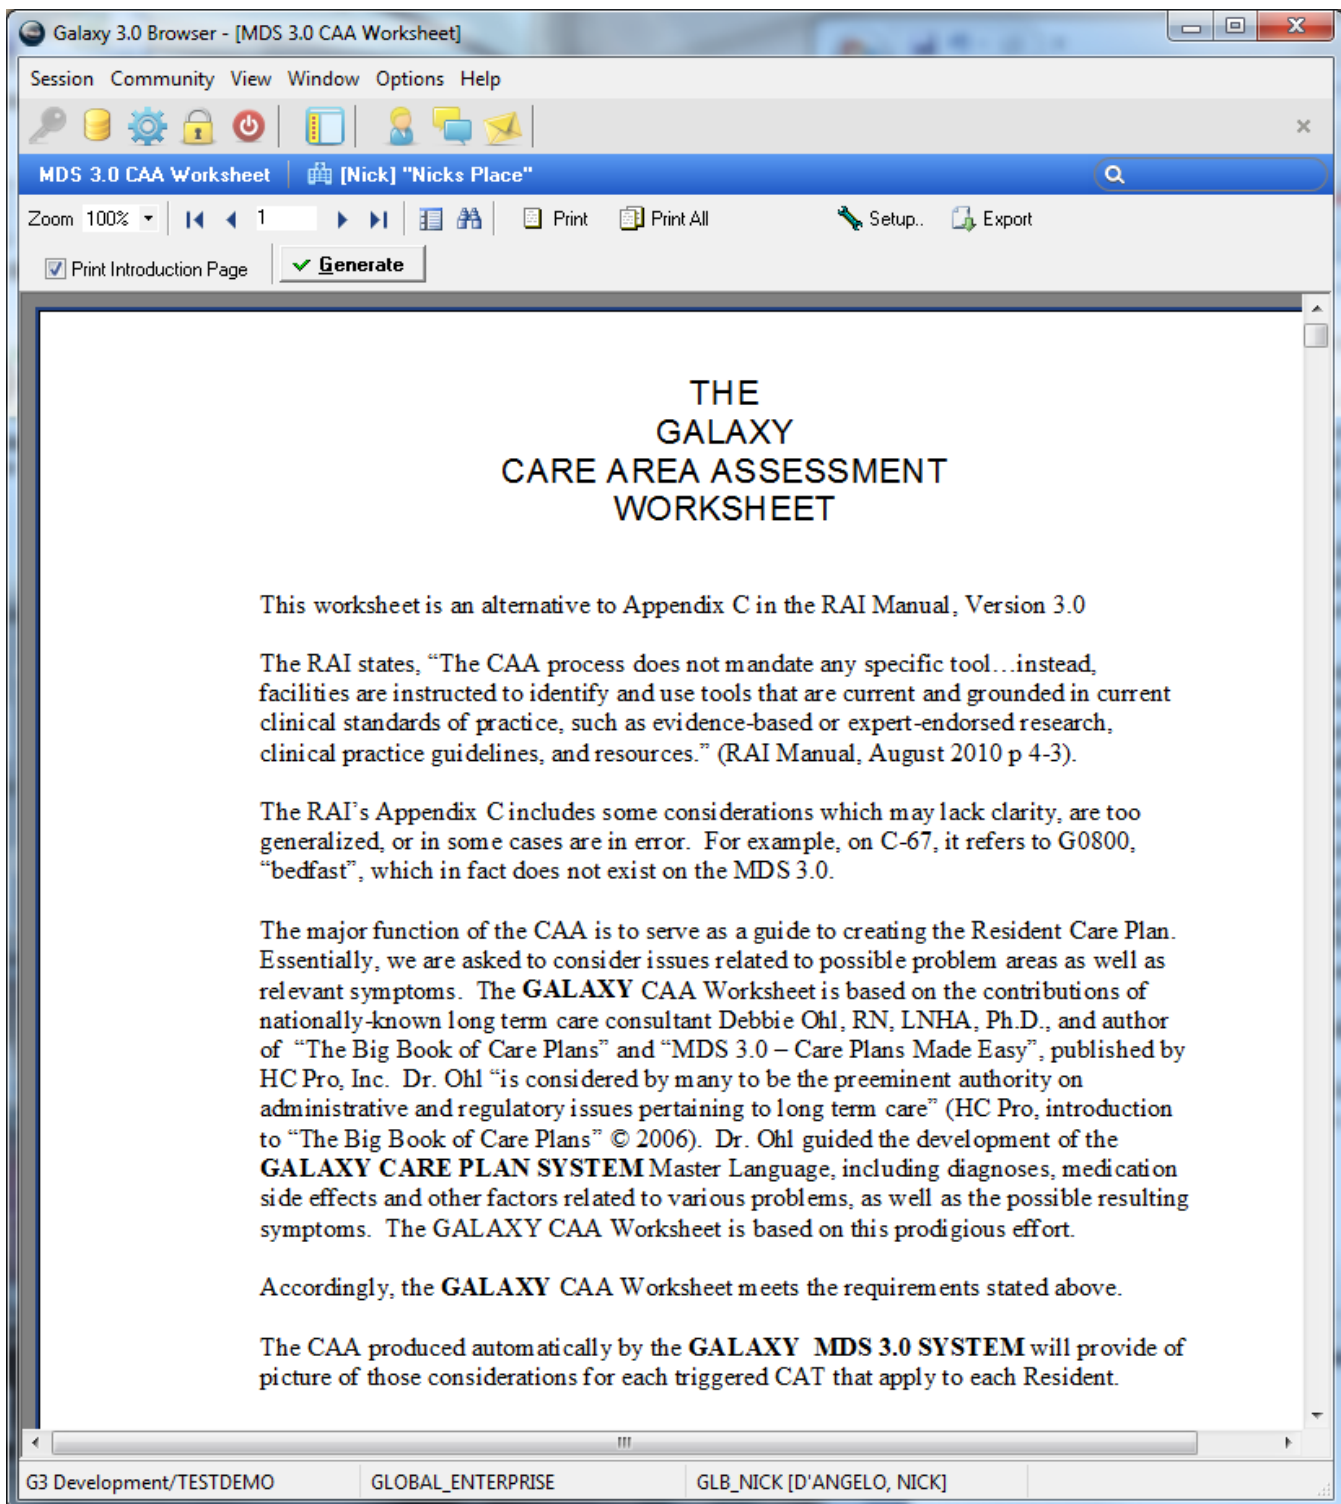

Other ADLs are also very important, but the research indicates that the late loss ADLs predict resource use most accurately. The early loss ADLs do not significantly change the classification hierarchy or add to the prediction of resource use.

Since the CAA's are integrated directly into our MDS 3.0 program, you do NOT need to manually create your CAA reports anymore.

We have included the MDS 3.0 CAA worksheet that shows (in 88 pages) what our program looks at to create the CAA report. You are able to print a blank report for manual entry at any time.

This also includes an introduction page that explains how we came up with the system.

ROSTER/SAMPLE MATRIX INSTRUCTIONS FOR SURVEYORS
(Use with Form CMS-802)

The Roster/Sample Matrix form (CMS-802) is used to list all current residents (including residents on bed-hold) and to note pertinent care categories. The facility completes the: resident name, resident room, and columns 6-30, all remaining columns are for Surveyor Use Only.

For the purpose of completing this form the terms: “facility” means certified beds (i.e., Medicare and/or Medicaid certified beds) and “residents” means residents in certified beds regardless of payer source.

The Roster/Sample Matrix is a tool for selecting the resident sample and may be used for recording information acquired during the tour. When using the form to identify the resident sample, indicate by a check whether this CMS-802 is being used for the sample from Offsite, Phase 1 or Phase 2. The horizontal rows list residents chosen for review (or residents encountered during the tour) and indicate the characteristics/concerns identified for each resident. Use the resident sample selection table in Appendix P of the State Operations Manual (SOM) to identify the number of residents required in the sample.

In the vertical columns under the heading **Review**, mark the *Interview: Individual /Family* column with ‘I’ for each resident receiving an interview or with ‘F’ for any non-interviewable resident receiving a family interview and/or staff observation. Mark the *Closed Record/Comprehensive/Focused Review* column with ‘CL’ for a closed record review, ‘C’ for a resident chosen for a comprehensive review or ‘FO’ for a resident chosen for a focused review. Use the vertical columns numbered 1 through 30 to check the characteristics for each resident, as appropriate. During each portion of the survey (Offsite, Phase I, Phase 2) highlight the vertical columns for each characteristic identified.

Resident Number: Number each line sequentially down the rows continuing the numbering sequence for any additional pages needed. These numbers may be used as resident identifiers for the sample.

Resident Name: List the name of the resident. **Resident Room:** Identify room # for the resident.

Surveyor Assigned: List initials or surveyor number of surveyor assigned to review each resident.

COLUMNS 6–30: Highlight each column that is an area of concern. For each resident entered on the roster/sample matrix, check all columns that pertain to the resident according to the Offsite and Sample Selection Tasks of the Survey.

<p>1. Privacy/Dignity: residents right to privacy, (accommodations, written and telephone communication, visitation, personal care, etc.) or concerns that the facility does not maintain or enhance resident’s dignity.</p>	<p>5. Clean/Comfortable/Homelike: facility’s environment including cleanliness, lighting levels, temperature, comfortable sound levels, or homelike environment and the resident’s ability to use their personal belongings and individualize their room to the extent possible.</p>
